

# Red teaming: A Pentest case study

**The scenario:** A global technology organisation wanted to see if it was possible for an attacker to take control of their network and steal sensitive product designs.

**The goal:** Gain domain level administrative rights.

**The result:** We were able to achieve the goal within the time frame set.

Here's how we achieved the goal

**Could a malicious threat actor gain access to your "crown jewels"?**

Our red team engagements simulate the actions of a real-world cyber-attack, helping you to uncover organisational vulnerabilities which could be used to compromise sensitive data, to put your security defences to the test and to ensure your most important assets are as secure as possible.
